DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 10 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding Claim 10, it is unclear what is meant in lines 7-8 by the language, "arranged in a domino pattern". It is not understood how the helix antenna elements can be arranged so because there does not appear to be a specific arrangement as described here. Clarification is required in order to provide and define a properly operating antenna device and system.

Allowable Subject Matter

- Claims 1-9 and 11-16 are allowed.
- 4. Claim 10 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
- 5. The patent to Albright is cited as of interest showing a combination of helix and spiral antenna elements in Fig. 8 and Fig. 16.
- 6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael C. Wimer whose telephone number is (571) 272-1833. The examiner can normally be reached on M-F.
